CAMPAIGN IN BRITAIN

CAMPAIGN IN GREAT BRITAIN
NOW IN FULL SWING

Liberals Are Making a General Attack on the Peers, and Lords are Held Up to Ridicule by Cartoons—Parliament Will Probably be Dissolved on Dec. 28 or 29, and Election Will Be Held in January.

London.—The election campaign is now in full swing, and many speeches are being delivered. Lord Lansdowne at Elymouth defined the issue as being tariff reform vs. the extinct budget and the two houses of parliament vs. a single chamber.

Winston Churchill spoke at Preston and attacked Mr. Balfour savagely. The Liberal Unionist council, on Austin Chamberlain's motion, passed a resolution of unequalled adherence to the policy of tariff reform.

England has before it a month of bitterest political conflict. Mr. Asquith has declared no quarter will be asked, and none will be given, and this is obvious enough already. Parliament will be dissolved probably on Dec. 28 or 29, to enable the election to be fought on the new register, which comes into force on Jan. 1.

Already the country is being flooded with red hot literature against dukes, and cartoons are holding the peers up to ridicule in a manner of old reform bill fight.

At the luncheon of the National Liberal club, Mr. Lloyd-George delivered a fighting speech in which he expressed confidence that although the budget had been buried it was assured the certain hope of an early resurrection. Attempts would be made, he said, to divert the minds of the people to irrelevant questions, but the dominant question was that of the House of Lords and this would absorb all others.

It was time for the Lords to be handled firmly, the chance has arrived and for one, he would not remain a member of the Liberal cabinet for an hour unless he knew that the cabinet had power to carry its bills. Declaring that a majority of the Lords were in their places simply to prevent the passage of Radical measures, he added that the greatest of choices in the upper house had been opposed to the rejection of the budget bill, and even Lord Lansdowne, he believed, would rather have passed the budget but he had been forced into the position taken against his better judgment. The chancellor concluded: "With all the Lords' cunning, their greed has overborne their craft, and we have got them at last."

To Train Colonials on British Ships. London.—Admiral Sir Arthur Knyvet Wilson has been appointed first sea lord of the admiralty in succession to Admiral Sir John Fisher, who retired Jan. 25. The latter will continue as a member of the committee of imperial defence.

In the house of commons, Mr. H. Macnamara, parliamentary secretary to the admiralty, replied to a question as to whether the admiralty would give the fullest facilities for training the officers of the colonial navies by receiving them aboard the warships.

Mr. Macnamara said the question had received the consideration of the admiralty, which would give every assistance possible for the instruction of colonial officers.

Canadian Exhibit. Omaha, Neb.—The Canadian exhibit at the National Corn exposition is furnished almost wholly by the province of Alberta and is about installed. While the States are showing corn and vegetables, Canada is exhibiting wheat. Occupying a large space in the centre of the building is a bin containing over 100 bushels of No. 1 hard wheat. The quality is pronounced the best ever seen in this section, and the grain is attracting much attention. The walls of the space are decorated with sheaf grains, wheat, oats and barley arranged in an artistic manner.

No Coal Shortage. Regina, Sask.—A representative sent by the provincial government to inquire into conditions, at the Edinburgh and Taber coal mines, consequent upon complaints from Swift Current and other points of a fuel shortage, reports that the mines are on the whole handling the situation satisfactorily, though, owing to the shortage of men, the output is hardly equal to the demand. The car service, however, is so far quite adequate and there is a continuance of mild weather during December it is not believed that any serious shortage will occur.

Canadians Satisfied. W. H. Gibson, who is in charge of Sir George Drummond's stock is very much pleased over the showing made by the Canadian stockmen. He says the visitors from across the international line are satisfied with the honors already won, but still have designs on other sheep trophies, especially in the Lincoln class, which has not yet been judged. "The Canadian sheep were a bit off their feed on account of the long railroad journey," said Mr. Gibson, "but we are well satisfied with our lot."

New Governor in B. C. Ottawa.—The resignation of Hon. James Dunsen as lieutenant governor of British Columbia has been accepted, and Thomas W. Patterson, son-in-law of Senator Riley, has been appointed in his stead. Mr. Patterson is a railway contractor, and an old timer.

New Standard Potato Barrel in Canada. Ottawa.—Mr. Fisher's resolution providing for a 160-lb. barrel of potatoes was adopted in the commons and a bill passed for the first time.

Senate Has Adjourned. Ottawa.—The senate has adjourned till January 12, after Chas. Fitzpatrick had given assent to the French treaty bill.

TALK ABOUT CANADIAN NAVY

Mr. Borden Warns the Canadian Government That They Should
Hurry With Defence

Montreal.—The annual dinner of the Montreal branch of the Canadian Manufacturers' association took place at the Windsor hotel. Mr. Wm. Caldwell occupied the chair. The chief speakers were Hon. L. P. Brodeur, Mr. R. L. Borden and Sir Thomas Shaughnessy. The minister of marine advocated a navy for Canada claiming that smaller and less worthy countries than the Dominion had each their navy. Referring to Chile, the Argentine, Brazil and Norway and Sweden and other nations, he said: "We should build a navy to protect our trade routes and coast lines."

Mr. Borden declared that it was the general desire of Canada to stand by the empire, adding that his party was on that side. "Canada," the leader of the opposition said, "should get busy and be ready for war; if war came it should be like a bolt from the blue. All haste should be made, as now was the time to prepare for any sudden emergency."

The president of the C. P. R. declared that the railway was both a manufacturer and consumer, and he compared this system of 3,000 miles in 1886 with 10,000 miles of today. In the old days, Sir Thomas said, the company had to become immigration agents, and they succeeded in getting the people to come to Canada. Still, he said, the great bulk of the population is east of the lakes, and this part of Canada must not be neglected.

Hon. Charles Devlin also spoke, and all the speakers received most generous applause.

Great Activity in Northern Railway

Edmonton.—There is great activity along the right of way of the Alberta and Great Waterways railway location and clearing parties will be worked to the limit all winter.

City auditor Richardson prepared the annual financial report of the city for the twelve months ending the 31st of October last. The report is very gratifying in that it shows a surplus of \$20,844 in the general fund, the total expenditure in which was \$443,682, compared with an estimated expenditure of \$437,536. In the four departments of civic utilities, the showing is not so good, the three dependent on the power house, viz., the street railway, the electric light and the waterworks, showing deficits. In the telephone department alone there is a surplus.

Says Colonies Do Not Support Lords

London.—The Earl of Crewe, winding up the debate in the house of lords, asked what their lordships thought their fellow citizens all over the Empire would think of what they were doing that night. Their action would be absolutely unintelligible to men of all parts of the self-governing colonies of the crown. It was a violation of the spirit of the constitution, and so forth. The speaker said practice that if their lordships were right and the country condoned what they were doing, their fellow subjects would not look to the mother of parliaments, but they would ask if the citizens of the old country were altogether fitted for the exercise of responsible government.

Colonial Fruit Show

London.—Princess Louise opened the Colonial Fruit show in the Horticultural building. The following are among the prize winners: Government of British Columbia for apples, gold medal; Kaslo district, silver gilt bannister medal; Salt Spring Island, silver gilt bannister medal; C. T. Cooney, silver gilt bannister medal; Strling and Pitcairn, silver gilt bannister medal; Okanagan Fruit union, silver gilt bannister medal; Mrs. J. Smith, silver gilt bannister medal; Victoria district, silver knight medal; C. W. Peters, Queenstown, silver medal; F. A. Hubbard, Burton, silver medal; J. P. Bulyea, Lower Gagetown, silver medal.

Year's Consumption of Cigarettes

Ottawa.—Mr. Blain, of Peel, who has for some years been trying to secure the passage of legislation prohibiting the manufacture, sale and importation of cigarettes, has secured from the minister of inland revenue some interesting figures regarding this industry.

During the past fiscal year 356,189,380 cigarettes were manufactured in Canada, of which 29,477,000 were produced in Ontario, and 326,712,000 in Quebec. There were 34,619 pounds of cigarettes imported during the same period which at an estimated weight of 2.8 pounds per 1,000 would represent 12,363,000 cigarettes.

Saskatchewan Wants H. B. Line

Regina.—In the legislative assembly H. H. Wilmyr (Pleasant Hills) gave notice of the introduction of a motion as follows: "That this legislature press upon the government of Canada the necessity and importance of immediate construction of the railway to Hudson's Bay, and request the government to make provision at the present session of parliament for immediate actual construction."

Not Buying B.C. Electric

Toronto.—The rumor that MacKenzie and Mann were acquiring control of the British Columbia Electric Railway company was denied by William Mackenzie in an interview here. "Neither Mackenzie and Mann nor the Canadian Northern," Mr. Mackenzie said, "have a share of stock of the British Columbia Electric Railway company nor are they expecting to have any of the stock."

Looking to Prairie Provinces for Profit

London.—Western Canada Timber Co. shows a loss for two years of \$153,140. The directors express the hope that there will be a distinct improvement when building in the prairie provinces is resumed next spring.

G. T. P. BRANCH LINES

MANY BRANCH LINES TO BE
BUILT IN ALBERTA

Grand Trunk Pacific Seeks Authority to Construct More Lines in the Prairie Provinces—Large Extensions Will Cover Large Territory and Open Up New Country—Will Apply for Act Incorporating Company.

Ottawa.—Notice is given that the Grand Trunk Pacific Branch Lines company will apply to parliament at its present session for an act further amending the act incorporating the company by authorizing the construction of the following additional lines of railway.

1. From a point in the western division of the Grand Trunk Pacific railway between the east limit of range 12 and the west limit of range 17, west of the third meridian, thence in a southeasterly and westerly direction to a point on the line which the company is authorized to construct to Calgary.

2. From a point on the proposed line mentioned in paragraph (1) between east limit of range 220 and the west limit of range 28, west of the third meridian, then in an easterly and southeasterly direction to Regina or to a point in the vicinity thereof.

3. From a point on the proposed line mentioned in paragraph (2) between east limit of range 24 and the west limit of range 27, west of the second meridian, to Moose Jaw, also to a point in the vicinity thereof.

Alberta Lines

4. From a point on the western division of the G. T. P. railway between Arthurs and Wainwright, thence in an easterly and southeasterly direction to a point on the line which the company is authorized to construct to Battleford.

5. From Regina or a point in the vicinity thereof, thence in a southeasterly and westerly direction to Lethbridge or to a point in the vicinity of Lethbridge on the line which the company is authorized to construct from Calgary to the southern boundary of the province of Alberta.

6. From a point on the main line of the western division between Moose Lake and Tete Jaune Cache, thence through the drainage of Clearwater river, Bonaparte river, Setton and Anderson lake and Lillooet river or the Squamish river, or between the last two rivers to Vancouver. British Columbia authorizing an issue of bonds to the extent of \$20,000 (a mile of said railway, numbered (1) to (5) inclusive and comprising said lines within what are defined by said act as the "Manitoba, Saskatchewan and Alberta extensions," authorizing an issue of bonds to the extent of \$50,000 a mile of the said line of railway numbered (6) and comprising the said line within what is defined by the said act as the "British Columbia Extension."

A New Gun to Shoot Flyers

Washington.—A gun is being designed by ordinance experts in the United States army for the distinct purpose of shooting dirigible balloons and aeroplanes. General Crozier, chief of ordinance in his annual report to the secretary of war, submitted, outlines of some of the difficulties which this gun must overcome.

"Dirigible balloons and aeroplanes move rapidly, change direction quickly, alter their elevations at will and are removed from any objects that assist aiming," he says. "For short ranges," General Crozier says, "it is probable that small arms, rifles or machine guns will be used against the men aboard airships and prove most effective. Sixty United States rifles, calibre 30, model of 1903, are now being fitted with a controller for vertical angle of fire."

Amending Railway Act

Ottawa, Ont.—Meighen's bill to amend the railway act was given the first reading. It extends the liabilities of the railway companies for failing to carry out to the act, and not building fences to keep cattle off the tracks. Lennox's bill to amend the criminal code by more adequately protecting dramatic copyright was given the second reading. Mr. Fisher has another amendment which will be included in the bill.

Swede King Works as Stevedore

Stockholm.—King Gustave of Sweden inaugurated a new departure for sovereigns. He spent several hours in disguise, working as a stevedore carrying sacks of coal from a lighter. When it was over the king said that this was the first of a number of similar attempts he will make to acquaint himself with the working conditions of the people of this country.

Customs Revenue Shows Increase

Ottawa.—The customs revenue of the Dominion for the eight months of the fiscal year to Nov. 30, totalled \$39,110,567, an increase of \$8,141,325 over the same period last year. For the month of November the increase was \$1,302,703.

Blindness Threatens General Booth

London.—General William Booth, of the Salvation Army, is threatened with blindness. An operation for a cataract forming on the one eye of use to him now is believed to be imperative.

Will Study Canadian Methods

London.—The Canadian Associated Press learns that a Danish commission of inquiry will visit Canada in January with the object of studying the administrative system and produce collection and shipment.

Dr. Cook in Asylum

Meredith, N. H.—It is stated here on good authority that Dr. Cook, the Arctic discoverer, is in an asylum near here. He is suffering from nervous breakdown.

LABOR AND GOVERNMENT UNITED

There Will Be a Good Working
Arrangement Between
Parties

London.—Mr. Balfour's health is an element of no little anxiety on the Unionist side, so much depends upon him, for no party could have a better constitutional fighter on a constitutional issue and he alone can keep the party strongly in line on moderate tariff reform and preference policy. All hope of Mr. Joseph Chamberlain's personal intervention is now dismissed. In an interview he said that tariff reform would not triumph at this election but would ultimately win out. He ignores shouters and looks to the silent voter whom two organizations have been educating for six years past all through England. Scotland is as yet little moved by tariff reform. The Unionists count on winning twelve to ten. Wales is even more irretrievably wedded to radicalism.

There is a good deal of comment upon the government's refusal to issue a writ for Portsmouth bye-election. The government writ indignantly denies that he is a party to the delay. He suggests the government fears Beresford's return and consequent damping of radical ardor through the country.

Also much discussed are the government's unceasing efforts to squash the labor party so as to avoid three-cornered fights. Labor members and national executive resolved after long discussion to withdraw a certain number of labor candidates, so as not to weaken the attack on the Lords. These labor withdrawals include Wansbeck Swanssea district, Swansea town, Midlothian, and two Lanark seats.

Cushing on the Grain Trade

Nelson.—Interviewed here on his way to Victoria where he is to meet Premier McBride to discuss terminal facilities for the Alberta grain trade, Mr. Cushing said: "A steamship company, subsidized by the Dominion government, desires to build terminal elevators at Vancouver, and has come to the Alberta government for further aid."

"Naturally," said Mr. Cushing, "we do not feel like acceding to the request. We have said to Vancouver if you want the trade it is your place to provide necessary facilities. I am going to Victoria to confer with the government and find out what that province is going to do." Mr. Cushing is sceptical as to the promise of William Whyte to provide facilities. He said it was a business proposition and he does not blame the company for its attitude.

Alberta Farmers Holding Their Grain

Calgary.—The grain produced in Alberta is evidently being held by the majority of farmers to judge from the report of Grain Inspector Hill for the past months of November and October and the corresponding November of last year. The report follows:

November, 1903—Spring wheat, 237 cars; winter wheat, 38 cars; oats, 301 cars; barley, 25 cars; rye, three cars; flax, 7 cars; total, 611 cars.

November, 1902—Spring wheat, 224 cars; winter wheat, 131 cars; oats, 313 cars; barley, 36 cars; flax, two cars; rye, three cars; total, 778 cars.

October, 1903—Spring wheat, 219 cars; winter wheat, 76 cars; oats, 118 cars; barley, 28 cars; flax, two cars; rye, two cars; total, 444 cars.

NEWS OF LONG LOST EXPLORER

Missionary From Reindeer Lake Gives

Information Received from the Eskimos of Andre's Death

Ottawa.—A very interesting story in connection with the long lost Andre, the explorer, who twelve years ago left Spitzbergen in a balloon in search of the North Pole and never returned, has been told in an interview by Bishop Albert Pascal of Prince Albert who has been the guest of the Oblate Fathers in Ottawa and has now left for his diocese. Bishop Pascal has charge of an immense territory extending even as far north as the pole. His story had to do with the country in the eastern portion of his diocese between Saskatchewan and Hudson Bay. There is a young priest, Father Turquille, a member of the Oblate Order who resides at Reindeer Lake, who had travelled extensively among the Eskimos in the northern part of the region in order to learn the language. On one occasion he went with a nomadic party about six days' journey to the northeast of Reindeer Lake and there met another party of Eskimos. Noticing a revolver which the priest carried the Eskimos told him that some years before a "white house had descended from the sky and contained white men who had killed many caribou to supply themselves with food."

They intimated that the white men were in a half starved condition. None of the men were now living, they stated, but the "white house" was still in existence and was used by members of the tribe as a sort of supply house for rope with which it was covered. It is thought that this may explain the disappearance of Andre and his companions, as Andre may have landed at the place indicated and perished. Father Turquille, said Bishop Pascal, will make another journey shortly and endeavor to get at all the facts in connection with the Eskimo's story.

Army is Bringing 5,000 from Britain

Halifax.—General Booth intends visiting Canada and the United States this winter, landing at Halifax in March or April. The Salvation Army expect to bring out five thousand people from Great Britain during the year.

Will Remove Cattle Embargo

London.—The Canadian Associated Press understands that the restrictions against the importation of Argentine cattle to this country will shortly be removed.

Rhode Island

Rhode Island received its name from what was supposed to be a resemblance in contour to the island of Rhodes, in the Mediterranean.

U.S. TO PUNISH ZELAYA

WANT SATISFACTION FROM
PRESIDENT OF NICARAGUA

American Warships are Now Being Hurried to Central American Ports to Exact Satisfaction from Zelaya, and Incidentally to Protect American Interests, Which are Said to be in Serious Danger.

Washington.—Naval forces of the United States are being moved forward to both coasts of Central America to protect American life and property in Nicaragua, by force of arms if the necessity arise.

With the departure from Philadelphia of the troop ship *Prairie*, with 700 marines aboard for the Isthmus of Panama, and if it also decreed, for Nicaragua, and with the sailing from Magdalena Bay of the protected cruiser *Albatross*, and the gunboat *Yorkton*, for Corinto, on the Pacific Coast of Nicaragua, the activity of the navy department on both oceans that wash the Nicaraguan shores, became manifest.

The cruisers *Des Moines* and *Tacoma*, and the gunboat *Marietta*, are lying off Port Limon. Costa Rica, ready for any call upon them and the guns of the gunboat *Vicksburg* are pointed towards the custom house and town of Corinto.

The gunboat *Princeton* is endeavoring to make her way from the Bremerton navy yard, Wash., to Corinto also. With the probability of many delicate situations arising in Nicaragua and demanding immediate response, the navy department decided to send a flag officer to Nicaragua to take command of the American naval forces, and Rear-Admiral W. W. Kimball was chosen for the duty. He sailed for Colon, Panama, on the *Prairie*. He will make his way from there to Corinto doubtless as rapidly as possible. Admiral Kimball has been a member of the naval boards of retirements and as constructor for more than a year.

Think Uncle Sam was Too Hasty

Mexico City.—The Mexican press comments editorially in sarcastic terms on the action of the United States in severing relations with Nicaragua. A recently established Spanish newspaper declares that it was not the rupture which caused amazement, but the terms of Secretary Knox's letter by reason of the "abuse" contained in it towards a republic of a sovereign nation. The declarations mark an epoch in Yankee imperialism and sanctify the right which a strong nation has to make war upon a weak one in the name of liberty and civilization.

Mexico Nuevo quotes secretary Knox in his reference to the revolution representing the idea of the people and declares "it appears that the success of a revolution depends upon ability to convince the Washington government that the movement so represents the people's ideal."

For Jam Pats.

A peal of new bells was recently hung in the tower of the historic parish church of Penny Drayton, Nuneaton, England, an old-world village hard by the Roman highway, which, as the birthplace of George Fox, will ever be associated with memories of the founder of the Society of Friends. The identical church in which Fox was christened, but the ancient stone font which did duty on that occasion was up to recent times knocked about in the churchyard in a derelict condition, being utilized at one period as a drinking trough. With the advent of a new incumbent, however, the old font found a resting place within the church.

That portion of the church register containing the entry of Fox's baptism was some years ago used by the wife of the then parish clerk to cover up jam pots in the fruit preserving season.

Half a Sovereign a Minute.

The Duke of Westminster owns about 30,000 acres in Cheshire and Flintshire, and 600 acres in London. Some years ago the late duke, when idle gossip put his income at a sovereign a minute, remarked that this was more than double his real income; but, allowing this, it still leaves about £250,000 a year.

The Duke of Westminster owns several racehorses, and the late duke was the owner of the famous Derby winners, *Ormonde* and *Flying Fox*, as well as two earlier winners *Bend Or* and *Shotover*.

It is related of the duke that on one occasion he was entertaining the King, but was not ready to receive His Majesty, his valet being unable to find his dual breeches.

No host may now receive the King in the evening in trousers, breeches being insisted upon by His Majesty.

An Amphibious Watch.

Mr. John Norris, a former chief constable of Coventry, whose death is just announced, was the possessor of a watch on which was engraved a view of the Tay Bridge, and which bore the following inscription: "The Tay Bridge disaster, December, 1879. This watch lay in the River Tay for six weeks; it stopped at the time of the accident, remained silent many days, started again, and worked nine hours under water." The watch had been lent to Mr. Beynon, an artist, of Cheltenham, who was drowned in the disaster. A charge of dynamite was afterwards used to raise the bodies from the river, and this doubtless started the watch again.

What a Storm Costs.

It has been calculated that a rainy day makes a difference of over \$5,000,000 to shopkeepers in the West End of London alone. While nearly all classes of tradesmen are grumbling and growling the tobacconists, however, cheerfully rubs his hands.

Rhode Island

Rhode Island received its name from what was supposed to be a resemblance in contour to the island of Rhodes, in the Mediterranean.

NEW BRUNSWICK'S VARSITY.

Mount Allison Is Steadily Growing
In Position.

The University of Mount Allison at Sackville, New Brunswick, dates from the year 1862, when, in accordance with an Act of the Legislature of New Brunswick, passed in 1858, a collegiate organization was effected, and the work of instruction was commenced. The internal administration of the university has been carried on upon strictly non-sectarian principles, and members of all denominations are found among the students. The ownership of the institution, however, is vested in the Methodist Church of Canada. The General Conference appoints a large number of the board of regents, to which, and to the senate, the government of the university belongs.

The total number of regular and special students, according to the last calendar, is about 175. There are ten resident professors and one lecturer, and the full arts course is four years. In connection with the university are two schools, one for boys and one for girls. The latter is one of the finest of its kind in the Dominion, with an attendance of about 150 and a staff of twenty-five teachers. A new brick building is shortly to be erected to accommodate the increasing attendance. The success of the school is largely due to the personality of the principal, Rev. Dr. Byron Borden, a member of the well-known Nova Scotia family which has given two leading statesmen to the Dominion. The university buildings generally are of a superior type, and are mostly constructed of the fine freestone which abounds in the neighborhood. The art building, a very handsome structure, contains a collection of paintings, mostly loaned by the Provincial Government, valued at \$80,000. The school of domestic science is admirably equipped and most efficiently conducted, furnishing one of the most important specialties of the work of the ladies' school.

Since its foundation, forty years ago, the college has had three presidents, the present incumbent being Dr. David Allison, who has held office for nearly thirty years. The most hurried or casual visitor cannot fail to be impressed by the fact that a splendid work is being carried on in all branches of this institution on thoroughly progressive and modern lines. A large increase of students at the university is reported this year.

Sackville is a town of about 2,000 people, seven miles distant from the thriving manufacturing town of Amherst. For miles on all sides stretch the celebrated Tantramar marshes, about which Charles G. D. Roberts and other Canadian authors of Maritime birth have written so much. The country is populous and prosperous, evidences of which are to be seen on every hand. The district is in a sense of the last struggle of the French for possession of the western portion of Acadia. Within a few miles of Sackville is the site of Fort Beauséjour, "famous in song and story," and Roberts and his cousin, Bliss Carman, have found the region rich in inspiration.

Humer in a Hymn Book.

Most people are aware that the new Anglican Hymn Book, the Book of Common Prayer, is now coming into use, but not so many have heard of the annotated edition, compiled by Mr. James Edmund Jones, a Toronto barrister, the convener and secretary of the compilation committee. The notes appended to each hymn deal with its history, the biography of the writer, and particularly the various readings of the hymn itself. It appears that very few well-known hymns have survived in their original form. Sometimes the author himself has changed them, but more often various readings are devised by editors, both for doctrinal and literary reasons. Some of the expressions used by the older hymn writers were more forcible than beautiful. For example, in Toplady's "Rock of Ages," the line "When mine eyelids close in death," which has been tinkered with by editors, appeared in the original "When my eyelids break in death."

The well-known hymn for Palm Sunday, "All glory, laud and honor to Thee, Redeemer, King," is from a long Latin hymn ascribed to Theodolph, Bishop of Orleans, A.D. 881. The hymn is obviously based on the story of Our Lord's entry into Jerusalem, riding upon an ass, and His reception by the children. Only the first twelve lines of the original are represented in the modern version, but up to the seventeenth century the following remarkable stanza was included:

Be Thou, O Lord, the rider,
And we the little ass,
That to God's holy city,
Together we may pass.
Fancy a congregation singing that!

Area Under Corn. A report on corn-growing, just issued by the Ontario Department of Agriculture, contains an article by Prof. C. A. Zavitz of the Ontario Agricultural College, in which he points out that there are 533,433 acres devoted to corn growing in the province. Of this acreage, more than one-half is located in the Counties of Essex, Kent, Middlesex, Elgin, Lambton and Oxford. Essex and Kent produce the greatest quantities of corn for huckling and Oxford and Middlesex the greatest amount for the silo. The market value of the corn crop in Essex and Kent, according to the latest report, was \$3,200,556 in 1907.

Have Notable Record.

Residents of Bowmanville feel that the "King's bounty" or some other royal recognition is due Mr. and Mrs. Harbort H. Dilling of that place. Thirteen years ago, on Dec. 23, they were married, and on the King's birthday they were blessed with their sixth child. The others are named: Lloyd, Ray, Borce, Nina and Fern. Ray was born on May 24, the late Queen's birthday, during Her Majesty's lifetime. Fern was one of the Toronto World's Leap-year babies of 1904. Fern was born on Nov. 9 last year.

THE SUNDAY SCHOOL

Lesson XI.—Fourth Quarter, For
Dec. 12, 1909.

THE INTERNATIONAL SERIES.

Text of the Lesson, II Tim. iv, 1-18,
Memory Verses, 6-8—Golden Text,
Phil. 1:21—Commentary Prepared by
Rev. D. M. Stearns.

In our last study for the present on the life of Paul it would seem wise to glance at the whole epistle rather than only at the last chapter. He is still of the same mind as when he wrote I Cor. ii, 2, determined to know nothing save Jesus Christ and Him crucified, for in this brief letter he mentions the Father, Son and Holy Spirit forty-eight times. His mind is stayed upon the Lord, concerning whom he says, "I know whom I have believed and am persuaded that He is able to keep."

Our lesson chapter opens with a solemn charge in view of the judgment, and we are reminded of Eccles. xi, v; xii, 14, "Know thou that for all these things God will bring thee into judgment," also of Matt. xii, 36, "Every idle word that men shall speak they shall give account thereof in the day of judgment." Let us remind ourselves that "the Father judgeth no man, but hath committed all judgment unto the Son, that all men should honor the Son even as they honor the Father" (John v, 22, 23). Believers who have died and who are resting from their labors, along with all living believers who shall be in a moment changed, shall appear for judgment at the judgment seat of Christ for believers only. Then there will be the judgment of living nations when He shall come with His saints to establish His kingdom, and a thousand years later the judgment of the rest of the dead at the great white throne. In due time and in due order there shall be a resurrection both of the just and the unjust and a judgment of all that have ever lived.

As His witnesses, His messengers, we are therefore to "preach the word" (verse 2), to preach the preaching which He bids us (John iii, 2; Jer. i, 7; Ezek. ii, 7; iii, 11), being warned, as were the prophets and apostles, that many will not endure it, but, loving pleasure more than God and being satisfied with a form of godliness without the power (iii, 4, 5), they will prefer lying, deceit and delusion to the truth of God (Isa. xlii, 18; xxx, 8-12). The word for the faithful witness is, "Watch, endure, fulfill thy ministry," "Please Him who hath chosen you," "Study to show thyself approved unto God" (verse 5; ii, 4). Many things look different when we come to the hour of our departure, but if by His grace we have fought the good fight of faith and have kept the faith (verse 7; I Tim. vi, 12) we may have boldness even in

Lost Him a Sale
 "He is a cynic," said Senator Tillman of a political antagonist. "He mistrusts all things. He's as bad as the Chicago drummer."
 "A Chicago drummer visited a prohibition state. A prohibitionist customer said to him proudly:
 "No, sir; the words beer and whiskey are unknown in this town."
 "The drummer nodded and whispered:
 "I see. What does one ask for?"

Now they say that merger was not cemented for purposes of public charity.

SICK HEADACHES

are not caused by anything wrong in the head, but by constipation, biliousness and indigestion. Headache powders or tablets may deaden, but cannot cure them. Dr. Morse's Indian Root Pills do cure sick headache in the sensible way by removing the constipation or sick stomach which caused them. Dr. Morse's Indian Root Pills are purely vegetable, free from any harmful drug, safe and sure. When you feel the headache coming take

A Failure

"It won't work," remarked Jones as he took his favorite seat in front of the hotel window.
 "What won't work?" inquired Fritz Smith.
 "This idea of thought transference. Tried it on my tailor. I looked at him steadily until I had his undivided attention. Then I said very slowly and with emphasis: 'That—bill—is—paid.'"
 "And what did he do?"
 "He said: 'you're—a—liar!'"—Lip-pincott's.

True love is something that is able to dispense with the advice of outsiders.

Ravages of Consumption

ALL HER RELATIVES HAD DIED OF CONSUMPTION
 In the year 1890, 18 years ago, Mrs. C. S. Gerner, of Belle Isle, N.S., was in a sad condition. All her relatives had died of consumption, and there was every indication that she was going the same way.
 Arthritis pointed her husband suggested to try Psychine. The doctor who attended said Psychine was worthless; but it effected a wonderful cure. Eighteen years after, in a letter bearing date August 14, 1908, Mrs. Gerner says, "I am better than I have been for years. My lungs have not troubled me since I took your treatment. My physician told me I could not take a better tonic than PSYCHINE, and I recommend it to all who are suffering from Lung Trouble and General Debility."
 For sale by all Druggists 50c. & \$1 per bottle.

PSYCHINE

PRONOUNCED SI-KEEN

SIRE AND SONS.

Herbert Henry Asquith, prime minister of England, was born in Yorkshire in 1852 and was a prize scholar at Oxford University.

Alfred H. Booth of Worcester, Mass., has been organist at St. Matthew's church for thirty years and in that time has missed but one service.

Speaking in Toronto recently, Dr. Wilfred T. Grenfell, the Labrador physician-missionary, outlined his project of erecting in St. John's, N. F., a home for seamen and fishermen.

Henry Savage Landor, the English explorer, who will soon make an attempt to reach the south pole, is of the opinion that Lieutenant Shackleton failed through having a cumbersome and unnecessarily large expedition.

It is estimated that General Luis Terrazas, the richest man in Mexico, has not less than \$200,000,000. His property holdings are located chiefly in the state of Chihuahua, but he also has large investments in other parts of the republic. He is the greatest land and live stock baron in the world. It is said.

Judge Robert Scott Lovett, who succeeds the late E. H. Harriman, was a playboy before he entered the railroad service. He was born in 1850 near Shepherd, Tex., worked on the farm, then in a neighboring store and at last for the Houston East and West as local agent. Once in the railroad business and admitted to the bar his advance was rapid.

The Duke of the Abruzzi is thirty-six years of age, and he has broken all climbing records by his ascent of Bride peak, in the Himalayas, 24,000 feet high and the highest mountain climb ever recorded. He was the first man to ascend Mount Ruwenzori, on the border of Legenda and the Congo Free State, while his arctic feats are among the most notable of the day.

English Etchings.

London has fifteen medical schools. Burying was a capital offense in England till 1820.

Births of English children used to be taxed—a duke 130 and "a common person" 2 shillings.

In one year the number of taxicabs in London has more than doubled, and the horse drawn cab will probably soon be extinct.

No fewer than 206 persons lost their lives in the mines of Lancashire, England, last year as against an average annual mortality of 140 in recent years.

It is not often that a gate is made out of a window, much less out of a prison window, but the gate of St. Cedd's churchyard, Canning Town, East London, was at one time a window in old Newgate prison.

Electric Sparks.

A galvanic cell has been invented which generates an alternating current.

The electric lighting industry is represented in the United States by 5,214 companies and municipal plants.

Electric laundries are being installed on the big ocean liners, where all the washing, drying and ironing are done by electricity.

In a recent test of a new German high speed telegraph apparatus 2,800 distinctly recorded words were transmitted 430 miles in five minutes.

A new application of the electric light bulb consists of a half cylinder, studded with incandescent lamps, which may be placed over a person lying in bed, the light being both radiated and reflected to him.

Household Hints.

A bare broom splitters matted badly. If you have no long handled, soft brush make a gray canton dandel covering for top of broom.

All the cooking utensils should be washed with soda immediately after they have been used, which will remove every trace of grease.

When running dates, eggs or raisins through the food chopper, add a few drops of lemon juice. It will do much toward preventing the fruit from clogging the chopper.

If you cannot use a scrub brush to get into all parts of the refrigerator when cleaning it, try using a small, stiff paint brush for the purpose. It reaches the corners.

The Art of War.

Although work has not yet been begun on two 26,000 ton battleships for the American navy, experts of the navy department already are figuring on 30,000 ton vessels.

The Austrian army is trying out a range finding rifle bullet which is hollow and carries a substance which gives off a puff of smoke when the bullet strikes anything hard.

For overhead firing against airships a German inventor has brought out a shell with a range of 20,000 feet, giving off a light by night and a smoke by day, so that its course may be traced.

Train and Track.

The death record of the railroads in New South Wales is one in seven years. Copper tubes are preferred to steel in locomotive boilers by many European experts.

Chinese railway cars have push buttons for food or refreshments, which are promptly answered by boy waiters.

The temperature of the fire of a morning locomotive has been determined to be 13,354 degrees at a speed of thirty miles an hour and 12,800 at a speed of nineteen miles.

PRESIDENT SUSPENDERS

You cannot feel fit with rigid suspenders—you cannot feel free. To know real ease, try the "sliding cords." All dealers, 50 cents. Light, medium and heavy weights.

**GET THE GENUINE—
"PRESIDENT" ON EVERY BUCKLE.**

Something in It
 "Do you believe there is anything in luck?" queried the shiftless person.
 "Yes," rejoined the hustler. "There is more or less intelligence and perseverance in it."

A Pill That Proves Its Value.—Those of weak stomach will find strength in Parmelee's Vegetable Pills, because they serve to maintain the healthful action of the stomach and the liver, irregularities in which are most distressing. Dyspepsia are well acquainted with them and value them at their proper worth. They have afforded relief when other preparations have failed, and have effected cures in ailments of long standing where other medicines were found unavailing.

Opinions and visits should never be forced upon people.

No one need endure the agony of corns with Halloway's Corn Cure at hand to remove them.

"What reason have you for thinking that he's a perfect gentleman?"
 "He must be. I had dinner at his house, and neither his wife nor daughter corrected him once."—Detroit Free Press.

Minard's Liniment for sale everywhere

Mrs. Maudsley—"Do your daughter and her husband live happily together?"
 Mrs. Oldham—"Alas! I'm afraid not. My daughter says they do, but every time I go to visit them there seems to be something present to mar the serenity of their lives."

Minard's Liniment Co., Limited.
 Gentlemen,—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of LaGrippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours,
W. A. HUTCHINSON.

First Fair Invalid.—"Which kind of doctor do you prefer—the allopathic or the homeopathic?"
Second Fair Invalid.—"I prefer the sympathetic."—Fligende Blaetter.

Often what appear to be the most trivial occurrences of life prove to be the most momentous. Many are disposed to regard a cold as a slight thing, deserving of little consideration, and this neglect often results in most serious ailments entailing years of suffering. Drive out colds and coughs with Bickel's Anti-Consumptive Syrup, the recognized remedy for all affections of the throat and lungs.

Japan has apple trees nowadays as well as cherry trees; the money value of this year's Japanese apple crop is estimated at \$1,500,000. There's a no home market to speak of in Japan for Irish potatoes, onions or cabbages, but the Japanese farmers are now raising all three for exportation to the Philippines, Siberia and Australia.

As a vermifuge there is nothing so potent as Mother Graves' Worm Expeller, and it can be given to the most delicate child without fear of injury to the constitution.

Patron (viewing portrait of his wife)—Er—er—I congratulate you sir, on your wonderful imagination.
Artist.—Whatever do you mean?
Patron.—Why you actually painted my wife with her mouth shut.

Minard's Liniment Cures Dandruff.

The Secret
 Wife (reminiscing)—Well, I very nearly didn't marry you, John.
 John (absent-mindedly)—I know but who told you? —The Sketch.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either there is no better preparation than Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is instantaneous and its application is extremely simple.

Dressed in the latest and most improved motorcycle costume, with goggles all complete, the motorcyclist daily toot-tooted his way toward the Zoo. Suddenly he slackened, dismounted, and said to a small, grubby urchin:

"I say, my boy, am I right for the Zoo?"

The boy gasped at so strange a sight and thought it must be some new animal for the gardens.

"You may be all right if they have a spare cage," he said doubtfully, when he could find his tongue; "but you'd stood a better chance if you'd only had a tail!"—Answers.

It is better to be a financier of kingdoms than a king of finance.

Shakespeareana
 Young Featherley—"Of Shakespeare's plays I think I prefer Richelieu."
 Miss Clara—"Er—but Shakespeare did not write 'Richelieu,' Mr. Featherley."

Young Featherley (with an amused smile)—"Ah! I see, Miss Clara, you are one of the few left who believe that Bacon wrote Shakespeare's plays. I wonder if the question will ever be satisfactorily settled?"—New York Times.

"Pa, what is a football coach?"
 "The ambulance, I guess."—Boston Transcript.

WOMEN WHO SUFFER
Dr. Williams' Pink Pills Give Regularity and Good Health

Every woman at some time needs a tonic. At special times unusual demands are made upon her strength. Where these are added to the worry and hard work which falls to her lot, weakness will result unless the blood is fortified to meet the strain.

Weak women find in Dr. Williams' Pink Pills the tonic exactly suited to their needs. Most of the ills with which they suffer are due to bloodlessness—a condition which the Pills readily cure. These Pills save the girl who enters into womanhood in a bloodless condition from years of misery, and afford prompt and permanent relief to the woman who is bloodless, and therefore weak. Mrs. R. Fisher, Coates Mills, N. B., says: "Sometime ago my system was in a very anaemic condition as the result of an internal hemorrhage caused by an accident. Though I had the services of a skilled doctor for a time, I did not recover my strength, and gradually I grew so weak that I could not do any house-work. As I seemed to grow steadily weaker I became much discouraged, for previous to my accident I had always been a healthy woman. About this time I received a pamphlet telling me of the strengthening powers of Dr. Williams' Pink Pills. I procured a box at once and began using them, when they were gone I got three boxes more, and by the time I had used these I found myself somewhat stronger and my appetite much better. Before I began the Pills I could scarcely walk up stairs, and could do no work at all. Now after taking three boxes I was able to walk out in the open air. I kept on with the Pills, and after using six boxes was delighted to find that I could again attend to my household affairs. I took two more boxes of the Pills, and I felt that I was as well as ever I had been, and equal to any kind of exertion. I have since recommended Dr. Williams' Pink Pills to friends with beneficial results."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

"Nothing lost here but the squeal," declared the pork packer. "Are you as economical in conducting your business?"

"Just about," answered the visitor. "I'm a lumber manufacturer. Nothing wasted but the bark."—Louisville Courier-Journal.

\$100 Reward, \$100.
 The readers of this paper will be pleased to learn that there is at least one diseased disease that can be cured in all its stages, and that is the disease known as the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietor has so much faith in its curative powers that they offer one hundred dollars for any case that they fail to cure. Send for literature.
 Address J. C. HENRY & CO., Toledo, O.
 Sold by all Druggists.
 Take Hall's Family Pills for constipation.

"Do you think that policeman on our beat ever does a thing to earn his money?"

"You bet I do, and a good, fat, juicy tip besides. He's been the case of our cook staying with us for the last seven years."—New York Herald.

George Washington, hatchet in hand, had just concluded the famous interview with his father. "It's lucky," he remarked to the nired man, "that I went after a cherry tree instead of the North Pole. Otherwise my motives and veracity would have been subjects of controversy for generations."—Washington Star.

W. N. U., No. 770.

SILENT LEGISLATORS.

Members of British Commons Who Never Speak.

Most members of the British Parliament think it incumbent upon them to do a little talking in the House, if it be only to almost empty benches, in order that their constituents may have the pleasure of reading their weighty utterances in the local paper. But, although Parliament is often taxed with loquacity, yet there are members in the present House who have done their duty faithfully by their constituents, but have never opened their lips to say a single word. It is more than probable that they have been quite as efficient representatives of their constituents as the member who is always trying to catch the Speaker's eye, and it is possible that the business of the country would be expedited if there were more of these silent members.

Some Parliamentary families are, indeed, noted for their silence. Probably no family has had more of its representatives in Parliament than the Tollemaches of Cheshire. But they have never been talkers. Indeed, there did not long ago one of them who has sat for over thirty years in Parliament and had been known to raise his voice only once in debate during the whole of that period.

The M.P. who was actually known as "The Silent Member" was Mr. W. Bramston Beach, who was for some time "Father of the House," and who sat for an agricultural division in the southwest of England. He was in Parliament for forty-six years, and during the whole of that time was only known to speak on six occasions. He was not, however, a taciturn man, but he was often heard to declare that too much time was wasted in the House by talk, and he was determined not to add to the bulk of it.

The present Father of the House, Sir John Kennaway, a typical English gentleman of the Sir Roger de Coverley pattern, is another silent member. Certainly he has made speeches in the House, but when he rises he is listened to with the respect which he deserves, but although he has been in Parliament for forty years it may be pretty safely said that his speeches combined would not make a very large pamphlet. Nevertheless, few members have done their duty by their constituents in a more conscientious, loyal, and wise manner than Sir John Kennaway.

It would almost appear as if one chance of becoming Father of the Commons was dependent upon exerting a very wide discretion with regard to speech, for Sir Charles Burrell, who was "Father" at a period preceding Mr. Beach, and who held a seat in the House for over six years, was distinguished by the eloquence of his silence. It is a remarkable fact that Sir Charles never dared to rise and address the House except once in all those six years. The exciting, important, and attractive subject which induced this reticent M.P. to break his "duck" was the introduction of a bill providing that housemaids should not be compelled by their employers to clean windows from the outside.

But even Sir Charles' great feat of silence has been beaten by General Forester, who represented the notable constituency of Much Wenlock for nearly fifty years, never once allowed himself the luxury of speech in Parliament! It is said that all sorts of devices and plots were started, both by his admirers and detractors in order to induce or compel him to address the House at least once, but all these plots signally failed.

"Bob's" Defeat in India.

It is not generally known that all through his military career Lord Roberts, who has just celebrated his seventy-seventh birthday, has been one of the finest riders in the army. In his younger days he was nicknamed "Jehu," because he rode furiously, and his prowess in the saddle has repeatedly astonished the fittest and hardest equestrians in the kingdom. Apropos of Lord Roberts' fondness for children we recall a curious adventure he met with one day in India. While visiting one of the native bazzars a pretty little child, the two-year-old daughter of the shopkeeper, ran into the shop. The temptation proved too much for "Bob," and he caught the little one in his arms and pretended to carry her off.

The child's mother, thinking he was kidnapping her baby in earnest, rushed upon him with the impetus of a tigress' leap. She snatched the terrified child from him, and, inveighing in her native tongue, drove the astonished hero of a hundred fights out of doors. "That day," says Lord Roberts when he tells the story, "I was defeated in India!"

Unequal Housing.

In England and Wales we find that the 20,000,000 acres of possible housing land is utilized by the 32,500,000 of population as follows: Seven and a half million people are spread over 19,800,000 acres, 12,000,000 people take up 152,000 acres, and the remaining 13,000,000 live on 48,000 acres. The one-roomed dwelling is bad, an excessive number of families to the acre is bad, the absence of playing sites and breathing-spaces is bad; but when all these evils exist together, as so often happens, the struggle is awful.

Well-Known on the Wolds.

William Moore, a postman, who died recently at Hovingham, near Malton, England, is said to have walked 226,500 miles during the forty years he was in the service of the postoffice department at Malton. Only once did he fail to make his long daily journey across the Wolds with his letters. That was in the great storm of February, 1890, when the snowdrifts were twenty feet deep.

Why Actors Wear Long Hair.

Marshall Hall, K.C., at the last dinner of the Playgoers' Club in London, referred to an early statute under which actors found wandering were liable to be branded through the right ear, and said that that was the reason so many members of the theatrical profession still wore their hair long. They wanted to conceal that particular decoration.

How He Fooled 'Em

Frank Nelson, former state superintendent of public instruction of Kansas and "Cap" Gibson, the veteran record clerk in Auditor Nation's office, are great friends. Nelson is now president of a Minnesota college. When Nelson was still in the statehouse, he and Gibson had a talk one day about teaching school. "I was once a school teacher," volunteered Gibson.

"Is that so?" asked Nelson. "How long?"
 "Yes, I fooled 'em thirteen years," replied "Cap."
 "How was that?" asked Nelson.
 "Oh," said Cap, "I quit when teachers had to qualify"—Kansas City Journal.

Not Bright to Him

Don't get down in the mouth, old man," said the optimist, "look on the bright side of things."
 "That's all very well," mournfully replied the sufferer, "but what is the bright side of a gumboll?"

Physiological

"Effie," said Margie, who was laboriously spelling words from a first reader, "how can I tell which is a 'd' and which is a 'b'?"
 "Why," replied Effie, wisely, "the 'd' has its tummy on its back."—Tit-Bits.

Mother.—"Were you good at the party?"
Six-year-old.—"Yes."
Mother.—"You didn't ask twice for anything at the table?"
Six-year-old.—"No, I didn't. I asked once and they didn't hear me, so I helped myself."

Mistress.—"Now, remember, Bridget, the Joneses are coming to dinner to-night."
Cook.—"Leave it to me, mum. I'll do my worst! They'll never trouble you again."

Doctor (to his cook, who is just leaving).—"Well, Mina, I am sorry, but I can only give you a very indifferent character."—Well, sir, never mind. Just write it like you do your prescriptions."

Tommy (during a temporary lull in the conversation).—"I say, ma, isn't it a pity you haven't got the toothache instead of poor Jane?"
Ma.—"Gracious me; why dear?"
Tommy.—"Why, cos you can take yours out, and she can't."—The Sketch.

He.—"Have you any reason for doubting what I say?"
She.—"Yes, I have."
He.—"What is it?"
She.—"I don't believe you."

A WINDSOR LADY'S APPEAL
 To All Women: I will send free, with full instructions, my home treatment which positively cures Leucorrhoea, Ulceration, Displacements, Falling of the Womb, Painful or Irregular Periods, Uterine and Ovarian Tumors or Growths, also Hot Flushes, Nervousness, Melancholy, Pains in the Head, Back or Bowels, Kidney and Bladder Troubles, where caused by weakness peculiar to our sex. You can continue treatment at home at a cost of only about 12 cents a week. My book, "Woman's Own Medical Adviser," also sent free on request. Write to-day. Address, Mrs. M. Summers, Box H. 77, Windsor, Ont.

"You can't get something for nothing."
"No?" Ask some of the mining stock brokers.

The Canadian Pacific Railway are running their Annual Excursions from Manitoba, Saskatchewan and Alberta to Eastern Canada, and with the Touring Sleeping Cars, now run on all through trains, enables passengers from Western Canada to travel East with comfort, and at a minimum cost. By taking the "All Canadian Route" (C.P.R.) passengers have very few changes of cars, no tedious transfers across crowded cities and no examination or bonding of baggage.

Mr. Crabshaw.—People who quarrel in low tone always say the meanest things.
Mrs. Crabshaw.—My, dreadful, isn't it! That woman in the next flat does that; I can never hear a word she says.—New York Tribune.

Minard's Liniment relieves Neuralgia.
 Husband, who fell asleep while receiving a Caudle lecture, hears the morning alarm clock. "Oh, for goodness sake, Maria, shut up!"—Boston Transcript.

A Cure for Rheumatism.—A painful and persistent form of rheumatism is caused by impurities in the blood, the result of defective action of the liver and kidneys. The blood becomes tainted by the introduction of uric acid, which causes much pain in the tissues and in the joints. Parmelee's Vegetable Pills are known to have effected many remarkable cures, and their use is strongly recommended. A trial of them will convince anyone of their value.

After a visit to a famous entomologist, whose wonderful microscopes have proved that there is always some living being to be found preying on the last of the minutest creature last seen, an English writer turned to him and said:
 "I came here, believing myself to be an individual. I leave knowing myself to be a community."—Youth's Companion.

These are the melancholy days when the old problem recurs: Shall we wear rubbers this winter or let our feet get wet?

Hands Covered With ECZEMA
 "For three weeks I actually had to be fed like one feeds a baby, because my hands and arms were so covered with eczema that they had to be bound up all the time."
 So says Miss V. McSorley, 75 Gore Street, Sault Ste. Marie, and adds: "From finger tips to elbows the disease spread; my finger nails came off and my flesh was one raw mass. The itching and the pain were almost excruciating. I had three months of this torture and at one time amputation was discussed."
 "Zam-Buk alone saved my hands and arms. I persevered with it, and today I am cured completely of every trace of the dreaded eczema. I fervently hope sufferers may learn of the miracle Zam-Buk has worked in my case."
 "Zam-Buk is without equal for eczema, ringworm, ulcers, abscesses, piles, cracked hands, cold sores, chapped places, and all skin injuries and diseases. Druggists and stores at 50 cents a box, or post free from Zam-Buk Co., Toronto, for price."

Just Like Her
 The average woman is not satisfied to do as she pleases unless she can make other people do as she pleases.—New York Times.

When a man's wife will let him have a latch-key it's a sign he will pretend down town he's the master of his own house.

Published Every Thursday in the heart of a Wonderfully Rich Ranching and Farming District.

Subscription, \$1.50 a Year; Foreign countries, \$2.00.
Exchange must be added on checks.

Legal Advertising 12 cents a line for first insertion and 8 cents a line for each subsequent insertion—12 lines to the inch. Local 10 cents a line. Lost, Found, Astry and Want advertisements 50 cents one insertion or three insertions for \$1. Display ads. \$1 per column inch per month. Changes should reach this office not later than noon each Monday.

W. PARK EVANS, Publisher and Proprietor.

Gleichen, Alberta, December, 9 1909.

If the farmers of Canada were as well organized as the railways or grain elevators, or the manufacturers, who is bold enough to predict what good they might accomplish.—High River Times.

The ratepayers of Gleichen are not taking the interest they should in the town generally. Any day now word may be received that this place is a duly incorporated town and that an election must follow at once. Therefore it is up to the ratepayers to not only select the best men obtainable but to discuss the situation thoroughly and be ready to handle the business that our progress warrants.

Bad cooking has killed many a man and for that reason it might be as well to license cooks just the same as we do doctors. Then if they kill us with indurated beefsteaks, incinerated hot cakes, or ptomaine pot-pie, we can smile as we swim the Styx to the wing station, glad in the thought that our demise was perfectly legal. We might here remark that there are no cooks in heaven. No meals are served there, although just outside the gate the space is full of waiters.—Lodge, Greenwood, B. C.

An Ottawa despatch says the total revenue of the Dominion for eight months of the fiscal year which closed on Nov. 10, was \$64656,509 as compared with \$55,155,227 for the same period last year, an increase of \$9,511,282. For the month of November alone the revenue was \$8,748,923 as compared with \$6,867,988 for November 1908. Expenditures for eight months totalled \$12,727,569 as compared with \$15,376,957 for the first eight months of last year a decrease of \$2,650,388.

It is estimated that this year the combined wheat crops of Canada, the United States, France, Hungary, Russia and Roumania, are 300,000,000 bushels, or one-sixth larger than last year. These countries produce two-thirds of the world's supply. Australia promises big yields, and so does Argentina. The heavy crops abroad must be considered in forecasting the price of Canadian wheat during the next twelve months. At the same time a leading grain dealer holds that Europe's stores are greatly depleted, that it must come to Canada for much wheat in the next few months, and that this factor will keep up prices.

Lord Strathcona, High Commissioner for Canada, has officially informed the Canadian Mail that:

1. Canadian trade has increased by \$13,000,000 during the first half of the present fiscal year.
2. The products of Western Canada may total \$330,000,000.
3. One firm has sold 350 steam ploughing outfits in the three Prairie Provinces this season.
4. The Grand Trunk Pacific Railway has handled 1700 grain cars already this fall. Winnipeg is now connected with Lake Superior by three lines of railway.
5. Over two and a half million bushels of grain have arrived at Montreal through the Lachine Canal during the first half of October, a year.
6. Property purchased seven years ago in Vancouver for \$28,000 is now figured far in advance of any former selling for \$125,000.

Negotiations extending over several months, and with a view to securing Prof. W. J. Elliot, of the Department of Dairying, Montana Agricultural College, as superintendent of the Strathmore Supply Farm have just been satisfactorily concluded by the Canadian Pacific Irrigation Colonization Company. Prof. Elliot has accepted the Company's offer and takes charge on January 1st. Apart from his duties on the Strathmore farm he will also sit in an advisory capacity to the superintendents of the various Demonstration Farms maintained by the company. At Strathmore he will continue to demonstrate the comparative values of irrigated and non-irrigated lands and will from the produce of the farm, supply the Canadian Pacific hotels and dining cars with the choicest Bow Valley products. Prof. Elliot in taking charge of this farm admits that it cannot be duplicated in the western states. Some idea as to the value and utility may be gained from the fact that some \$50,000 was spent this year on barns, dairy equipment, and buildings poultry ranch and thoroughbred live stock. Prof. Elliot will also continue to develop certain special high grade cereals, and will endeavour to add to the present unexcelled qualities of Bow Valley barley. A large portion of his time will be devoted to the giving of lectures throughout the district, and his influence will be toward the upbuilding of a conservative and intensive agriculture.

TOWN AND DISTRICT

The moving picture performance last Friday night was far from being what it advertised. A few of the views were good but all were too ancient for a town like Gleichen.

The date for the Ranchers' annual ball has been set for Dec. 29th and the invitations have already been issued. As usual this will be the event of the season.

Xmas. cards and post cards now on display at Yates' drug store. Cards from 5c. to 50c. and a large assortment to choose from.

It is about time the shows, concerts, etc., in this town should begin their performances on time. It is becoming unbearable for people with punctual habits to wait for every little or big meeting. Will someone please make the break.

Harold E. Birch left on Saturday on a visit to his home in England, with the intention of returning to Gleichen next spring—it is expected not alone. On Friday evening Rev. Mr. Castle entertained at his home the choir of St. Andrew's church in honor of Sir Harold's departure, of which he has been a member for the past three years. Sir Harold will be greatly missed this winter in town—especially in the ringing of the bell.

The third C. P. Walker performance is booked for Dec. 15th and it is to be the best yet. Reduced prices. Reserve seats 75c and general admission 50c including a dance.

Be a booster. It is so easy when you know how. There is no reason why every man, woman and child in Gleichen and the district should not be a booster. Some people think that a booster and a boomer are synonymous, but that is not the case. A booster is one who is optimistic and believes in the future of the country he is living in, not simply for what he can get out of it. Be a booster. Everyone may be a booster. The Gleichen Call has been a booster for the last three years and during that time, week by week, has endeavored to lay before its readers the possibilities of this district. It may be asked by some people: "How can I be a booster? I live out in the country and see very few people, especially those who come into the country with a view of settling." The question is easily answered. Everyone has friends in Eastern Canada, the United States or the Old Country, and to these everyone should write occasionally, telling of the progress of the country and at the same time sending a copy of the Call, which contains always one or more articles along the lines of the development of the country. Everyone may be a booster, everyone should be a booster. The country needs boosters, so it would be well to be a booster.

Farmers Remember.

The Grain Growers Grain Co. have opened an office in Calgary for the transacting of all Alberta business. For any information re prices or the marketing of your grain write us. That is what we are here for.

GRAIN GROWERS GRAIN CO., LTD.
41 Box 1669, Calgary, Alta.

Jones was touring through the country on his bike, and late at night, in a lonely part, the machine bust up.

He saw a light in the distance, so he walked over towards it, and discovered a farm house. Rain was falling when he reached the door and knocked.

The farmer opened the door and said, "What d'ye want this time o' night?"

Jones explained his plight, and was asked in the good farmer telling him he could, of course, stay the night, but mentioning that there were only two sleeping rooms, one of which was occupied by himself and his wife, and the other by the baby. The farmer seemed puzzled how to arrange matters, and said: "You wouldn't like to sleep with baby, would you?"

"No," said Jones; "though why shouldn't you and I sleep in your room, and your wife and the baby sleep in the baby's room?"

This the farmer agreed on, and so they slept.

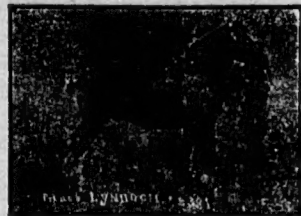

In the morning Jones got up and had a look around the garden, while the farmer was seeking the cows. While passing the kitchen he looked in and saw the loveliest girl he had ever seen, a perfect beauty.

He said to the farmer, who had joined him, "My word! What a lovely maid you have! She's perfect!"

"Yes," said the farmer. "But she is not our maid. That's baby!"
